A warm and healthy night's sleep

PurFlo has introduced four fabulous new designs to its unique range of baby SleepSacs.

PurFlo SleepSacs have a silky soft 100% bamboo fabric lining that is naturally anti-bacterial and absorbs 60% more moisture than cotton. This combined with a high tech anti-bacterial "Amicor" filling to prevent the build-up of nasty bacteria, fungi and House Dust Mites make the SleepSacs particularly ideal for babies prone to allergies such as Asthma and Eczema.

Unique features include a zipped wide open front for easy night nappy changes with a minimum disturbance, a soft chin guard to prevent rubbing and zip-on sleeves for added warmth on colder nights with built in scratch mittens on the smaller sizes (0~3 months & 3~ 9 months).

Available in 4 sizes from new born to 18 months plus, the new designs include gorgeous appliqué elephants, lions, owls and giraffes and are available in natural or bright colours.
